Polish Air Force University Adds Robinson R44s to Fleet

Torrance, CA — Robinson Helicopter Company delivered two R44 Raven IIs to longtime Robinson dealer, PHU Polinar of Poland. On November 13th, PHU Polinar delivered the aircraft to the Polish Air Force University, marking the first acquisition of American helicopters to be used for military training.

Founded in 1927, the Polish Air Force University is an accredited state institution that offers undergraduate degrees for officers in the Polish military as well as commercial ratings for civilian students.

According to PHU Polinar, the more than 70 Robinson helicopters successfully operating in Poland convinced the state the R44 is not only reliable but is the right vehicle for its flight training programs. Both R44s were equipped with a fully integrated glass cockpit featuring Garmin's GDU 1060 TXi, GTN 750 navigator, GTX 345 transponder with ADS-B In/Out and Spidertracks for real time tracking.

Founded in 1973, Robinson Helicopter Company is the world's leading manufacturer of civil helicopters.
